

DC Inverter MMA Welding Machine

This DC inverter MMA welder is designed for manual metal arc welding. It features adjustable current and arc force along with a digital display for precise settings.

Overview

Professional DC Inverter MMA Welder

This DC Inverter MMA welding machine is engineered for efficiency, offering a compact and lightweight design that reduces energy consumption. It features advanced arc-striking capabilities and stable performance with minimal spatter, ensuring high-quality welding results. Built with safety in mind, the unit includes integrated self-protection mechanisms against over-voltage and over-current conditions.

Performance

Welding Performance

- Good arc-striking capability
- Stable arc with little spatter
- Deep molten pool for reliable welding effects
- Workable against interference

Key Features

Compact Design, Lightweight, Energy Efficient, Over-voltage Protection, Over-current Protection

Technical Specs

Model Identifier

ZX7-315
