

DC Inverter MMA Welding Machine

This DC inverter MMA welder is compact, lightweight, and energy-efficient. It ensures a stable arc, minimal spatter, and high-quality welds, while also featuring self-protection against over-voltage and over-current.

Product Overview

Professional DC Inverter MMA Welder

This DC Inverter MMA Welding Machine is engineered for professional-grade performance in a compact, portable form factor. It delivers exceptional welding quality with a stable arc and minimal spatter, ensuring deep, reliable molten pools. Designed for efficiency, it features low energy consumption and advanced self-protection mechanisms against over-voltage and over-current conditions.

Performance & Features

Key Features

- Compact size and lightweight design
- Low energy consumption
- Excellent arc-striking capability
- Stable arc with little spatter
- High welding quality
- Deep molten pool penetration

Safety & Protection

Over-voltage Protection, Over-current Protection, Anti-interference

Technical Specifications

Welding Performance

200 A

Max Current

Compatible Technology

IGBT • MOSFET
