

DC Refrigeration Compressor

This refrigeration compressor is designed for 12/24V DC power systems. It utilizes R134a refrigerant and is suitable for various cooling applications.

Product Overview

Compact DC Refrigeration Solution

The QDZH25G refrigeration compressor is engineered specifically for high-efficiency cooling in 12V and 24V DC power systems. This compact unit utilizes R134a refrigerant to provide consistent and reliable thermal management for specialized refrigeration applications. Its design prioritizes energy efficiency and durability, making it an ideal choice for mobile cooling and off-grid refrigeration requirements.

Technical Specifications

Model Number	QDZH25G
Voltage Compatibility	12V DC, 24V DC
Refrigerant	R134a

Performance Metrics

Key Performance Metrics

12 V DC
Min Voltage

24 V DC
Max Voltage
