

DC10-80V 10W Red/Blue Forklift LED Work Light

This DC10-80V 10W LED work light is designed for forklift applications. It provides focused illumination in red and blue colors, enhancing visibility and safety in industrial environments.

ADDITIONAL IMAGES

Product Overview

High-intensity LED work light designed for industrial safety and visibility.

Industrial Safety LED Work Light

This 10W LED work light is specifically engineered for forklift and industrial vehicle applications, providing critical safety signaling in red or blue. Designed to operate across a wide DC 12-80V range, it ensures compatibility with diverse electrical systems while maintaining high energy efficiency. With a durable IP65-rated construction and a 10,000-hour lifespan, it offers reliable performance in demanding warehouse and construction environments.

Performance Metrics

Key Performance Indicators

10 W

Power Consumption

50 lm

Luminous Flux

10000 Hrs

Service Life

Electrical Specifications

Wide voltage range ensures compatibility with various forklift electrical systems.

Input Voltage	DC 12-80V
Power Supply Type	DC
Support Dimmer	No

Lighting Characteristics

Available in focused red and blue colors for signaling in warehouse environments.

Light Source LED	
Available Emitting Colors	Red, Blue, Yellow
Color Temperature (CCT)	460-465K

Physical & Environmental

Robust construction built to withstand vibrations and impacts in demanding industrial settings.

Ingress Protection IP65	
Product Size	140 x 90 x 105 mm
Operating Temperature	-30°C to 60°C

Compliance & Logistics

Professional grade components with international certifications including CE and RoHS.

Customization Options

- Custom color box available for orders over 1000 pcs
- Various models available
- OEM/ODM support based on 15+ years experience

Certifications	CE, RoHS, REACH
Warranty Period	12 Months
Minimum Order Quantity	200 PCS
