

DDR 8.0H Standard Memory Connector

This DDR 8.0H standard connector is designed for memory module interfacing. It provides a reliable and secure connection for memory modules, ensuring high-speed data transfer and stable performance.

Product Overview

DDR 8.0H Standard Memory Connector

The DDR 8.0H standard connector is engineered for reliable memory module interfacing in a variety of computing environments. Featuring a compact 8.0mm height, this connector ensures stable performance and high-speed data transfer for DDR memory applications. Built with durable materials, it is designed to withstand repeated insertion and removal cycles, making it an ideal choice for desktops, laptops, and other high-performance computing devices.

Technical Specifications

Key Features

- High-speed data transfer
- Stable performance
- Durable construction
- High cycle durability

Standard

DDR Standard

Connector Height

8 mm

Compatible Applications

DDR Memory, Laptops, Desktops, Computing Devices
