

Dead Blow Hammer, 3.5-inch Head, 12-inch Length

This dead blow hammer is designed with a durable, non-marring head to minimize rebound. The hammer measures 3.5 inches in head width and 12 inches in overall length, making it ideal for controlled force applications.

Product Overview

Professional Dead Blow Hammer

This dead blow hammer is engineered for precision and control in industrial applications. Featuring a specialized non-marring head, it is designed to minimize rebound while delivering maximum impact force. With a compact 12-inch total length and a 3.5-inch head width, it is an essential tool for tasks requiring controlled force without damaging delicate surfaces.
