

Debris & Waste Material Elevator

This elevator is designed for handling debris and waste materials in agricultural and construction settings. It features a robust frame and rotating scoop system, suitable for removing accumulated materials from trenches or pits.

Overview

Heavy-Duty Material Handling Solution

This high-capacity debris and waste material elevator is engineered for demanding agricultural and construction environments. Featuring a robust, heavy-duty frame and a sophisticated hydraulic scoop system, it is designed for efficient material extraction and waste management. Its durable construction ensures reliable performance even when handling mixed organic and inorganic debris.

Technical Specifications

Design Features

- Heavy-duty frame
- Rotating scoop/bucket system
- Hydraulic cylinders and lines

Application	Agriculture, Construction, Waste Management
Operation Mechanism	Hydraulic
Surface Finish	Industrial Orange
