

# Deck Floor Slab Roll Forming Machine

This roll forming machine is designed for manufacturing deck floor slabs and sheets. It ensures precise and efficient production of metal profiles with consistent quality.

## Product Overview

### Professional Deck Floor Slab Roll Forming Solution

This high-performance roll forming machine is engineered for the precise production of colored glaze steel roof and wall tiles. Designed for efficiency, it offers a production capacity of 8-10 meters per minute, making it suitable for large-scale construction demands. The system features a robust 7.5KW motor and is built to ensure consistent, high-strength sheet output for durable flooring solutions.

## Technical Specifications

### Production Capacity

**8 m/min**  
Min Speed

**10 m/min**  
Max Speed

### Power Requirements

**7.5 KW**  
Power

**380 V**  
Voltage

### Dimensions & Weight

Attribute	Value
Length	11000 mm
Width	1300 mm
Height	1400 mm
Total Weight	7.45 t

## Operational Details

### Machine Capabilities

- High Rib roofing roll forming
- Compatible with PPGI/GI materials
- Produces high strength sheets
- Easy to operate

### Warranty & Support

1 Year Warranty • Overseas Engineering Support

### Certifications

BV Certified
