

Deep Groove Ball Bearing 110x170mm

This deep groove ball bearing is designed to handle both radial and axial loads. It is manufactured with high-quality steel and precision-ground surfaces for smooth operation and extended service life.

Product Overview

High-Performance Deep Groove Ball Bearing

This 110x170mm deep groove ball bearing is engineered for high precision and long-term durability in demanding industrial environments. Designed to handle radial and axial loads effectively, it ensures smooth operation in critical machinery such as electric motors, gearboxes, and pumps. Its robust construction makes it a reliable component for diverse sectors including metallurgy, mining, and agriculture.

Technical Specifications

Bore Diameter	110 mm
Outside Diameter	170 mm
Width (Thickness)	28 mm
Model Number	6022

Application Fields

Suitable Industries	Railways, Metallurgy, Oil Drilling, Mining, Agriculture
---------------------	---
