

Deep Groove Ball Bearing

This deep groove ball bearing is designed for high-speed applications requiring radial and axial load support. It is suitable for use in electric motors, gearboxes, pumps, and various industrial machinery.

Product Overview

Precision Deep Groove Ball Bearing

This precision-engineered deep groove ball bearing is designed for high-speed applications and reliable performance under radial and axial loads. Constructed with hardened steel races and precision-ground balls, it ensures smooth operation in demanding industrial environments. The unit comes pre-lubricated to extend service life and reduce maintenance requirements, making it an ideal component for electric motors, gearboxes, pumps, and various rotating machinery.

Technical Specifications

Key Features

- High-speed capability
- Radial and axial load support
- Pre-lubricated for extended life
- Sealed design to prevent contamination

Common Applications

Electric Motors • Gearboxes • Pumps • Industrial Machinery

Bearing Type

Deep Groove Ball Bearing

Construction Materials

Hardened Steel Races, Precision-Ground Balls

Identification

Model Markings

- 22023
- 6202
- ESE
