

Deep Groove Ball Bearing 62310-2RS1

This deep groove ball bearing is engineered for high radial loads and moderate axial loads. It is sealed with 2RS1 type seals for enhanced protection against contaminants and lubrication retention.

Product Overview

High-Precision Deep Groove Ball Bearing

The 62310-2RS1 is a high-precision deep groove ball bearing engineered for optimal performance and durability in demanding industrial environments. It features deep, uninterrupted raceway grooves that allow for high radial loads and moderate axial loads in both directions. Equipped with 2RS1 seals, this bearing offers superior protection against contaminants while ensuring excellent lubrication retention for an extended service life.

Technical Specifications

Model Number	62310-2RS1
Structure	Deep Groove
Type	Ball Bearing

Certifications

Quality Standards	ISO 9001:2000
