Product Overview

High-Efficiency Filtration Solution

This deep pleated HEPA air filter is engineered for critical environments requiring stringent air quality control. Constructed with micro fiber glass media and aluminium foil separation, it ensures optimal airflow and particle capture. Available with flexible frame options, it serves as a reliable terminal filtration solution for clean rooms, hospitals, and industrial facilities.

Technical Specifications

Frame Options

- Aluminium Alloy
- Metal
- Wooden

Efficiency Ratings

H13, H14, EU13, EU14

Filter Media

Micro fiber glass with aluminium foil separation

Usage & Compatibility

Target Industries

Pharmaceutical • Laboratory • Semiconductor • Food & Beverage • Healthcare

Compatible Systems

- HVAC Systems
- Ventilation Systems
- Clean Rooms
- Air Purifiers
- Spray Paint Booths

Customization

Customization Available

Yes
