

Deep Throat Power Press

The deep throat power press is a versatile metal forming machine designed for pressing operations. Its deep throat design provides flexibility in handling large workpieces and complex shapes.

Overview

J21S Series Deep-Throat Power Press

The J21S Series deep-throat power press is a robust and versatile metal forming machine engineered for a wide range of pressing operations. Its specialized deep-throat design provides increased flexibility, allowing for the handling of larger workpieces and complex shapes with ease. Built for durability and performance, this press features a rigid frame construction that ensures high stability, consistent accuracy, and an extended service life for demanding industrial environments.

Key Features

Suitable Applications

Deep Drawing, Punching, Bending, Metal Forming

Safety & Design

Safety Equipment

- Emergency stop buttons
- Safety interlocks

Frame Construction

Rigid frame for stability and accuracy

Performance

Drive System

Reliable drive system for precise and controlled pressing force
