

Deep Well Submersible Pump

This high-performance deep well submersible pump is designed for efficient water extraction from boreholes. Constructed with stainless steel, it offers durability and corrosion resistance.

Product Overview

High-Performance Submersible Solution

This deep well submersible pump is engineered for high-efficiency water extraction from boreholes. Constructed from robust stainless steel, it offers exceptional durability and resistance to corrosion, making it suitable for irrigation, domestic water supply, and industrial applications. Its multi-stage design ensures reliable operation and consistent flow rates even at significant depths.

Technical Specifications

Material	Stainless Steel
Design	Multi-stage Submersible

Applications

Suitable Applications	Irrigation, Domestic Water Supply, Industrial Use, Borehole Extraction
-----------------------	--

Performance Features

Key Performance Benefits

- High-performance extraction
- Corrosion-resistant construction
- Consistent flow rates
- Reliable in demanding environments
