

Deflection Coil

This deflection coil is engineered for precise beam control in various applications. Its robust construction and optimized winding configuration ensure minimal distortion and reliable electrical connections.

Overview

High-Performance Deflection Coil Series

This deflection coil series is engineered for precise beam control across a variety of demanding applications. Featuring a robust construction and an optimized winding configuration, these coils are designed to minimize distortion while ensuring reliable electrical connections. They deliver stable and accurate deflection performance with low power consumption, making them an ideal solution for beam-steering systems.

Technical Specifications

Key Features

- Robust construction
- Optimized winding configuration
- Minimal distortion
- Reliable electrical connections
- Low power consumption

Suitable Applications

CRT Displays, Electron Microscopes, Beam-Steering Systems

Performance Metrics

Performance Highlights

1 High

Deflection Accuracy

1 Low

Power Consumption
