

Demolition Hammer

This heavy-duty demolition hammer is built for demanding concrete and masonry work. It features a powerful motor, ergonomic design with vibration dampening, and a secure chuck system for quick bit changes.

Product Overview

Heavy-Duty Demolition Hammer

This high-performance demolition hammer is engineered for demanding concrete and masonry applications. It features a robust construction designed to withstand the rigors of heavy construction and renovation projects. With an emphasis on user comfort and efficiency, it includes advanced vibration dampening and a secure chuck system for rapid bit changes.

Model Number

CYHY-DW-38C

Key Features

Core Benefits

Vibration Dampening, Quick-Change Chuck, Heavy-Duty Construction, High-Power Motor

Applications

Primary Applications

- Concrete breaking
- Masonry chipping
- Demolition tasks
- Renovation projects
