

Demolition Hammer

This demolition hammer is a powerful tool designed for heavy-duty demolition tasks. Its ergonomic design ensures user comfort and reduces fatigue during extended use.

Overview

High-Performance Demolition Solution

The Z1G-HB-1307 Demolition Hammer is a powerful tool engineered for heavy-duty demolition tasks, delivering exceptional breaking performance through its high-impact mechanism. Designed with a robust motor and an efficient cooling system, it ensures reliable operation during professional construction and renovation projects. The ergonomic design prioritizes user comfort, effectively reducing fatigue during extended use on hard materials like concrete and asphalt.

Performance

Key Performance Metrics

1307 HB

Model Series

Ideal Applications

Concrete Breaking, Asphalt Removal, Professional Construction, Renovation, Heavy-Duty Demolition

Design & Build

Key Features

- Robust high-torque motor
- High-impact mechanism for maximum breaking power
- Durable construction for long service life
- Integrated efficient cooling system
- Easy-to-use controls

Ergonomics

Ergonomic Design

Fatigue Reduction • User-Centric Design • Extended Use Ready
