

Demolition Hammer Rotor Replacement Part

Replacement rotor armature for demolition hammers. Designed for high-torque applications and efficient power transfer.

FOR BOSCH GSH11E

Demolition Hammer

Overview

High-Performance Demolition Hammer Rotor

This high-quality rotor is a precision-engineered replacement part designed for heavy-duty demolition hammers. It features robust copper windings and a laminated steel core to ensure efficient power transfer and durability during high-torque applications. The integrated cooling fan and drive shaft are optimized for long-term performance in demanding construction environments.

Technical Design

Core Components

- Copper windings for superior conductivity
- Laminated steel core for reduced energy loss
- Integrated commutator
- High-efficiency cooling fan
- Precision drive shaft

Performance

Performance Features

High-Torque, Efficient Power Transfer, Heavy-Duty, Heat Dissipation

Compatibility

Equipment Compatibility

GSH11E Type

Application

Demolition Hammer (Electric Pick)
