

Desktop PC Computer Case

This computer case is designed for desktop PCs. It accommodates standard ATX motherboards and provides sufficient space for internal components.

Overview

Desktop PC Computer Case

This versatile desktop PC case is designed to accommodate standard ATX and Micro ATX motherboards, making it an ideal choice for various builds. The chassis features a white exterior with a distinct red accent line and includes essential front-panel connectivity such as USB ports and audio jacks. With a bottom-mounted power supply design and extensive cooling support, this case provides a reliable foundation for internal components while ensuring optimal operating temperatures.
