Product Overview

Precision Internal Measurement

This dial bore gauge set is engineered for high-accuracy internal diameter measurements in machining and quality control environments. It features a high-resolution dial indicator and a versatile collection of interchangeable anvils, allowing for a wide measurement range. The set is designed for durability and ease of use, ensuring precise readings for professional engineering applications.

Key Features

Features

- Designed for internal diameter measurement
- Hardened contact point for longevity
- Changeable anvils for wide measuring range
- Dial indicator included

Technical Specifications

Anvil Sizes Included

Anvil ID	Size
No.1	50
No.2	55
No.3	60
No.4	65
No.5	70
No.6	75
No.7	80
No.8	85
No.9	90
No.10	95
No.11	100
No.12	105

Minimum Measurement Range	50 mm
Maximum Measurement Range	105 mm
Dial Resolution	0.01 mm

Application

Suitable Applications	Machining, Automotive, Quality Control, Precision Engineering
