

Dial Caliper for Precision Measurement

This precision dial caliper is designed for accurate measurements in machining and engineering applications. The shock-proof dial indicator provides direct readings to 0.01mm, ensuring high precision.

Product Overview

Precision Engineering Tool

This dial caliper is strictly manufactured in accordance with DIN862 standards, ensuring reliable performance for professional engineering and machining applications. It features high-quality precision-ground racks and a durable metal housing with shock-proof capabilities. The tool is designed for versatility, offering 4-way measurement capabilities for outside, inside, depth, and step dimensions.

Technical Specifications

Measurement Modes	Outside, Inside, Depth, Step
Manufacturing Standard	DIN862
Measurement Resolution	0.01 mm

Construction & Design

Housing Features

Shock-proof • Sealed Dial • Chrome-plated

Construction Highlights

- Precision ground racks
- Ground jaws for enhanced accuracy
- Durable metal housing

Surface Finish	Satin chrome with laser-etched markings
