Product Overview

High-Efficiency Diamond Brazed Drill Bits

These diamond brazed hole saw drill bits are engineered for high-efficiency drilling in hard materials including granite, marble, ceramic, and glass. Utilizing an advanced vacuum brazing process, they offer superior durability and a longer service life compared to standard electroplated tools. Designed for both wet and dry applications, these bits ensure fast, smooth cutting performance and excellent chip removal.

Technical Specifications

Compatible Shanks

M14 • Hexagonal • Round

Available Sizes

8mm - 120mm

Diamond Tip Height

10 mm

Available Grit Sizes

#30, #40, #50
