

Diamond Bullnose Grinding Wheel for Stone

This diamond grinding wheel is used for shaping and profiling stone edges to create a bullnose or rounded edge. It features a durable metal bond with diamond abrasive for efficient material removal and a smooth finish.

Product Overview

Professional Stone Profiling Solution

This diamond bullnose grinding wheel is engineered for precision shaping and profiling of stone edges. Utilizing a durable metal bond with high-quality diamond abrasives, it ensures efficient material removal and a consistent, smooth finish. It is specifically designed for wet grinding applications, which helps minimize dust production and significantly extends the operational lifespan of the tool.

Technical Specifications

Compatible Materials	Granite, Marble, Natural Stone
Application Method	Wet grinding

Key Features

Edge Profile	Bullnose • Rounded
Abrasive Material	Diamond
Bond Type	Metal Bond
