

# Diamond Coated Rotary Burr Set

This diamond burr set contains assorted shapes and sizes for precision work. Each burr is diamond-coated for efficient material removal and shaping on hard materials.

## ADDITIONAL IMAGES

## Product Overview

### Precision Diamond Burr Set

This diamond-coated rotary burr set is engineered for high-performance grinding, carving, and engraving tasks. Featuring industrial-grade diamond particles electroplated onto durable steel shanks, these tools deliver exceptional hardness and longevity. The set includes a versatile range of shapes such as cylinder, ball, cone, and flame, making it an ideal choice for professional detail work on hard materials like glass, stone, ceramic, and hardened metals.

## Technical Specifications

### Available Head Shapes

- Cylinder
- Oval
- Cone
- Ball
- Tapered Point
- Flame

<b>Compatible Materials</b>	Glass, Stone, Ceramic, Metal, Hardened Steel
<b>Construction Material</b>	Industrial-grade diamond coating on steel shank

## Usage & Applications

### Primary Applications

Grinding • Carving • Etching • Engraving • Detail Work

<b>Tool Compatibility</b>	Rotary tools, die grinders, and flexible shaft machines
---------------------------	---------------------------------------------------------

## Package Contents

Set Size	8 pieces
Storage	Compact storage case included
