

Diamond Core Drill Bit

This professional-grade diamond core drill bit is suitable for drilling clean, precise holes in hard materials such as tile, porcelain, granite, marble, and glass. It features side slots for easy core ejection and a standard shank for compatibility with most drill chucks.

Product Overview

Professional Diamond Core Drill Bit

This professional-grade diamond core drill bit is engineered for precision and durability when working with demanding materials like porcelain, granite, marble, and glass. Featuring a diamond-impregnated cutting edge, it ensures efficient material removal and an extended service life. The high-quality steel body provides the necessary strength and stability for clean, accurate holes, making it an essential tool for contractors, plumbers, and electricians.
