Diamond Core Drill Bit for Concrete

This diamond core drill bit is designed for efficient drilling of concrete. It features a durable steel body, diamond-impregnated segments, and a threaded connection for easy use with drilling equipment.

Product Overview

Professional Diamond Core Drill Bit

This diamond core drill bit is engineered for precision and efficiency when drilling into hard concrete surfaces. It features a robust steel construction paired with diamond-impregnated cutting segments to ensure an extended service life and consistent performance. Designed for versatility, this tool supports both wet and dry drilling applications, making it a reliable solution for various construction and renovation projects.

Technical Specifications

Material Composition

- Robust steel body
- Diamond-impregnated cutting segments

Target Material

Concrete

Drilling Capabilities	Wet Drilling, Dry Drilling
Mounting Connection	Threaded connection
