Diamond Core Drill Bit for Tile and Stone

This diamond core drill bit is designed for drilling clean, precise holes in hard materials such as tile, porcelain, granite, marble, and glass. It features a durable diamond-impregnated cutting edge for extended life and efficient material removal.

Product Overview

Professional Diamond Core Drill Bit

This diamond-impregnated core drill bit is engineered for precision drilling in hard materials including tile, porcelain, granite, marble, and glass. The robust steel body design ensures structural stability, while the specialized cutting edge provides extended service life and high-efficiency material removal. Designed for seamless compatibility with standard drill chucks, this tool is the ideal solution for both professional contractors and demanding DIY applications.

Technical Specifications

Key Features

- Diamond-impregnated cutting edge
- Durable robust steel body
- High-precision hole drilling
- Standard chuck compatibility

Application Scope

Professional Use • DIY Projects

Suitable Materials	Tile, Porcelain, Granite, Marble, Glass
