

Diamond Core Drill Bit Set for Concrete

This set features high-performance diamond core drill bits and accessories. They are designed for engineering construction, wall drilling, and concrete applications, offering efficient and precise drilling in hard materials.

Product Overview

High-Performance Diamond Core Drill Bits

This diamond core drill bit set is engineered for professional construction and engineering applications. Featuring robust construction and advanced diamond-impregnated cutting edges, these tools ensure efficient and precise drilling performance in hard materials. The comprehensive set includes various sizes and configurations to accommodate diverse drilling requirements on site.

Applications

Primary Applications

- Engineering construction
- Wall drilling
- Concrete applications

Technical Features

Construction Type

Diamond-impregnated edge • Robust design

Compatible Materials

Concrete, Masonry, Wall
