Overview

Professional Diamond Core Drill Bit Set

This professional-grade diamond core drill bit set is engineered for precision drilling in demanding materials including reinforced concrete, brick, block, and masonry. Designed for high efficiency and longevity, these bits feature a robust steel body and a specialized diamond matrix that ensures fast, clean cutting. Suitable for both wet and dry drilling applications, this versatile set is an essential tool for plumbers, electricians, and general contractors.

Technical Specifications

Drilling Modes

Wet Drilling • Dry Drilling

Construction Features

- High-quality diamond segments
- Durable steel body construction
- Precision-engineered diamond matrix
- Turbo segment design

Compatible Materials

Reinforced Concrete, Concrete, Brick, Block, Masonry, Stone

Key Metrics

Available Dimensions

120 mm

Diameter

450 mm

Length

108 mm

Diameter

500 mm

Length

Target Users

Primary Applications

- Construction
- Plumbing
- Electrical Installation
- General Contracting
