

Diamond Core Drill Bits

High-performance diamond core drill bits are designed for drilling precise holes in concrete, masonry, and other hard materials. These durable tools feature diamond-impregnated segments for efficient cutting and extended lifespan.

Product Overview

High-Performance Diamond Core Drill Bits

These diamond core drill bits are engineered for professional-grade performance in demanding construction and plumbing environments. Featuring advanced diamond-impregnated segments, they ensure efficient cutting and an extended operational lifespan. Designed for versatility, they support both wet and dry drilling applications, delivering clean and precise holes in concrete, masonry, and other hard materials.

Technical Specifications

Operating Modes

Wet Drilling • Dry Drilling

Key Features

- Diamond-impregnated segments for high cutting efficiency
- Engineered for extended tool lifespan
- Designed for clean and accurate hole formation

Suitable Materials

Concrete, Masonry, Hard Materials
