

Diamond Core Drill Bits for Tile and Glass

These diamond core drill bits are designed for drilling clean, accurate holes in tile, glass, ceramic, porcelain, and other hard materials. They feature a durable diamond-coated cutting edge and provide efficient material removal.

Product Overview

Professional Diamond Core Drill Bits

These diamond core drill bits are engineered for high-precision drilling in challenging materials such as tile, glass, ceramic, and porcelain. Featuring a high-durability diamond-coated cutting edge, these tools ensure clean, accurate holes while maintaining an extended service life. The robust steel body construction provides the stability required for both professional contracting projects and rigorous DIY applications.

Technical Specifications

Cutting Material	Diamond Coated
Body Material	High-Quality Steel

Application

Target Audience

- Professional Contractors
- DIY Enthusiasts

Compatible Materials	Tile, Glass, Ceramic, Porcelain
