

Diamond Core Drilling Machine

This diamond drilling machine is engineered for creating precise holes in materials like concrete and masonry. It features a powerful motor, a sturdy drill stand for enhanced stability, and a water cooling system to prolong the life of the diamond bit.

Product Overview

Professional Diamond Core Drilling Solution

The DE2001 Z1Z-NG-200 is a robust diamond drilling machine engineered for creating precise holes in concrete, masonry, and other hard materials. It features a powerful motor paired with a sturdy drill stand, ensuring stability and accuracy during operation. Equipped with an integrated water cooling system, the machine effectively extends the life of the diamond bit while minimizing dust, making it an ideal choice for construction, plumbing, and electrical applications.

Technical Specifications

Model Number	DE2001 Z1Z-NG-200
Applications	Construction, Plumbing, Electrical Installation, Concrete Drilling, Masonry Drilling

Key Features

Stability Components

- Sturdy drill stand
- High-precision core drill bit
- Powerful motor

Cooling System	Yes
Dust Reduction	Yes
