

Diamond Cutting Blade

This diamond blade is designed for cutting hard materials such as concrete, stone, and masonry. It features a segmented rim for efficient debris removal and cooling, ensuring extended blade life and precise cuts.

Product Overview

High-Performance Diamond Cutting Blade

This high-performance diamond blade is engineered for demanding cutting tasks on hard materials, including concrete, stone, and masonry. Featuring a specialized segmented rim, it ensures efficient debris removal and superior cooling, which extends the blade's operational life and allows for highly precise cuts. Designed for versatility, this tool is suitable for both wet and dry cutting applications and meets rigorous safety standards for professional use.

Technical Specifications

Blade Diameter	230 mm
Bore Size	22.2 mm
Cutting Modes	Wet Cutting, Dry Cutting
Rim Design	Segmented

Compliance & Usage

Suitable Materials

- Concrete
- Stone
- Masonry

Safety Compliance

Professional Grade
