

Diamond Cutting Blade for Stone and Tile

This diamond blade is designed for cutting a variety of materials, including tile, stone, and concrete. It features a durable steel core with a diamond-impregnated cutting edge for fast, clean cuts.

Product Overview

Precision Cutting Performance

This diamond cutting blade is engineered specifically for high-performance cutting of porcelain tile, stone, and concrete. Featuring a specialized thin core and a fine turbo design, it delivers smooth, fast, and chip-free results. The inclusion of cooling holes helps dissipate heat during operation, significantly extending the service life of the blade for both wet and dry cutting applications.

Technical Specifications

Design Features

- Thin core design
- Fine turbo cutting edge
- Integrated cooling holes
- Diamond-impregnated edge

Operation Mode

Wet Cutting • Dry Cutting

Compatible Materials

Porcelain Tile, Stone, Concrete
