

Diamond Cutting Blade for Stone Tile Concrete

This diamond cutting blade is engineered for precise cutting of hard materials such as stone, tile, and concrete. It features a segmented rim for efficient debris removal and enhanced cooling.

Product Overview

Professional Diamond Cutting Performance

This high-performance diamond cutting blade is engineered for the precision cutting of challenging materials including stone, tile, and concrete. Its sophisticated segmented rim design facilitates rapid debris removal and optimal cooling, which helps maintain cutting accuracy and tool longevity. Designed for versatility, this blade is compatible with both angle grinders and circular saws, supporting both wet and dry operational requirements.

Technical Specifications

Suitable Materials	Stone, Tile, Concrete
Rim Configuration	Segmented
Operating Modes	Wet Cutting, Dry Cutting

Compatibility

Compatible Power Tools

- Angle Grinders
- Circular Saws

Key Features

Enhanced Cooling • Efficient Debris Removal • Precision Cut
