

Diamond Cutting Grinding and Polishing Tool Set

This set includes a variety of diamond-based tools for cutting, grinding, and polishing. It features laser-welded blades, grinding wheels, core bits, and polishing pads in multiple sizes.

Product Overview

Professional Diamond Tool Set

This comprehensive diamond tool set is engineered for versatile cutting, grinding, and polishing applications in professional construction and masonry projects. The assortment includes specialized laser-welded and high-frequency blades for precision cutting, alongside efficient turbo and double-row grinding wheels for material removal and shaping. With the inclusion of diamond core bits and various polishing pads, this set provides a complete solution for achieving smooth, professional-grade finishes across a wide range of materials.

Included Components

Component	Function
Laser-Welded Blades	Cutting
High-Frequency Blades	Demanding Cutting Tasks
Turbo Grinding Wheels	Efficient Material Removal
Double Grinding Wheels	Specialized Shaping
