

Diamond Cutting Segments

These diamond segments feature high-quality diamonds and advanced techniques. Strict process control ensures optimal segment performance.

Overview

High-Performance Cutting Solutions

These diamond cutting segments are engineered with high-quality synthetic diamonds and advanced manufacturing techniques to ensure superior performance. Designed for durability and precision, they are ideal for demanding applications in construction and masonry. Each segment undergoes strict process control to guarantee reliability and a long service life during operation.

Applications

Compatible Tools

- Saw Blades
- Core Bits

Compatible Materials

Cured Concrete, Reinforced Concrete, Brick, Block, Masonry, Stone

Quality Assurance

Quality Control

Advanced Techniques • Strict Process Control • High-Quality Diamond
