Product Overview

Professional Diamond Grinding Solutions

This premium diamond cup wheel is engineered for efficient surface preparation and material removal. Designed for durability, it features high-quality diamond segments that ensure long-lasting performance across a variety of demanding tasks. Its robust construction minimizes vibration, providing smooth and consistent results for leveling, coating removal, and edge grinding.

Technical Specifications

Compatible Materials	Concrete, Medium Hard Granite, Soft Sand Stone, Roof Tile, Brick Block, Cured Concrete, Masonry
Grinding Method	Dry grinding
Recommended Tools	Angle grinder

Key Features

Performance Benefits

- Aggressive material removal
- Smooth finishing capabilities
- Minimal vibration during operation
- Durable segment construction
