

Diamond Grinding Wheel

This circular diamond grinding wheel is designed for grinding and cutting hard materials. It features diamond-tipped segments for efficient material removal when used with compatible electric tools.

Product Overview

High-Performance Diamond Grinding Wheel

This diamond grinding wheel is engineered for precision and durability in demanding industrial applications. Featuring diamond-tipped segments, it delivers superior cutting performance on hard materials. The design includes a standard central hole and additional mounting holes for secure, reliable attachment to compatible electric power tools.

Technical Specifications

Tool Type	Diamond Grinding Wheel
Cutting Edges	4
Tool Compatibility	Electric Power Tools, Grinding Accessories

Design Features

Mounting Configuration

- Central arbor hole
- Dual secondary mounting holes

Material Suitability

Hard Materials • Stone • Concrete • Masonry
