

Diamond Grinding Wheel for Concrete and Stone

Diamond grinding wheels are engineered for grinding concrete and stone. They feature durable diamond segments that provide aggressive material removal and a long service life.

Product Overview

High-Performance Grinding Solution

This diamond grinding wheel is engineered for demanding concrete and stone surface preparation tasks. Featuring robust diamond segments, it provides aggressive material removal rates and ensures an extended service life for professional applications. It is an ideal choice for tasks ranging from initial surface leveling and coating removal to concrete polishing.

Technical Specifications

Key Features

- Durable diamond segments
- Aggressive material removal
- Extended operational life
- Versatile segment configurations

Suitable Applications

Concrete Grinding, Stone Grinding, Surface Preparation, Coating Removal, Concrete Polishing
