

Diamond Grinding Wheel for Glass Edge Grinding

This diamond grinding wheel is suitable for use with domestic and imported glass linear edge grinding machines and glass linear bilateral edge grinding machines. It is available in sizes 80# and 320#.

Product Overview

Precision Diamond Grinding Wheel

This diamond grinding wheel is engineered for high-performance edge grinding on both domestic and imported linear edge grinding machines. Designed for durability and efficiency, it is suitable for processing optical glass, crystal handicrafts, and furniture stone. Available in multiple dimensions and grit sizes to meet specific industrial material removal requirements.

Technical Specifications

Machine Compatibility

- Glass linear edge grinding machine
- Glass linear bilateral edge grinding machine

Available Grits

80#, 320#

Dimensions

Standard Dimensions

Diameter (mm)	Width/Thickness (mm)	Bore (mm)
