Product Overview

High-Efficiency Diamond Grinding Wheels

These diamond grinding wheels are engineered for superior material removal and surface preparation on non-metallic materials like concrete and stone. Characterized by high efficiency, sharpness, and long service life, they are designed to handle demanding grinding and sharpening tasks. The robust construction ensures optimal performance, while the segmented rim design facilitates effective cooling and dust extraction during operation.

Key Features

Performance Characteristics

High Efficiency, High Sharpness, Long Service Life, Fast Grinding Speed

Technical Specifications

Segmented Single Row Cup Wheel Dimensions

Outer Diameter (inch)	Outer Diameter (mm)	Segment Dimension (H x T)	Segment Number
4"	105	7x5	7
4.5"	115	7x5	8
5"	125	7x5	9
6"	150	7x5	10
7"	180	7x5	12

Segmented Double Row Cup Wheel Dimensions

Outer Diameter (inch)	Outer Diameter (mm)	Segment Dimension (H x T)	Segment Number
4"	105	7x5	14
4.5"	115	7x5	16
5"	125	7x5	18
6"	150	7x5	20
7"	180	7x5	24

Turbo Cup Wheel Dimensions

Outer Diameter (inch)	Outer Diameter (mm)	Segment Dimension (H x T)
4"	105	20x5
4.5"	115	20x5
5"	125	20x5
6"	150	20x5
7"	180	20x5
