

Diamond Grinding Wheel for Material Removal

This diamond grinding wheel is engineered for efficient material removal and surface preparation. It features a durable steel core with diamond-impregnated segments for aggressive grinding action on concrete, stone, and other hard materials.

Overview

Professional Material Removal

This diamond grinding wheel is engineered for efficient material removal and surface preparation on tough substrates. Featuring a durable steel core with segmented diamond grit, it provides aggressive grinding action while maintaining a long operational life. The design includes strategically placed cooling holes to dissipate heat, ensuring smooth performance and reduced vibration during use.

Technical Specifications

Diameter	125 mm
Compatible Materials	Concrete, Granite, Limestone, Masonry, Stone
Tool Compatibility	Angle Grinder

Design Features

Cooling Design	Yes
Segment Configuration	Spiral pattern for efficient dust removal
