Product Overview

Professional Diamond-Coated Hole Saw

This diamond-coated hole saw is engineered for precision drilling in brittle materials such as glass, ceramic tile, marble, and granite. Featuring high-quality diamond grit, it ensures clean, accurate cuts while minimizing chipping. The design allows for efficient core removal, making it an essential tool for professional installation and renovation projects.

Technical Specifications

Operational Requirements

- Requires water cooling during operation
- Compatible with standard drills
- Use with pilot drill guide for accuracy

Compatible Materials

Glass, Ceramic Tile, Marble, Granite, Vitrified Brick, Microcrystalline Stone

Product Features

Key Benefits

Clean Cutting • High Durability • Easy Core Removal • Precise Positioning
