

# Diamond Non-Coring Drill Bit

This diamond non-coring drill bit is designed for precision drilling in hard materials. It features a durable diamond-impregnated cutting edge for extended life and efficient material removal, making it ideal for creating clean, accurate holes without a core.

## ADDITIONAL IMAGES

## Product Overview

### Precision Diamond Non-Coring Bit

This diamond non-coring drill bit is engineered for precision drilling in challenging hard materials. It features a diamond-impregnated cutting edge designed for efficient material removal and extended tool life. Built with a robust steel body, it minimizes vibration to ensure clean, chip-free, and accurate holes without the need for coring.

## Technical Specifications

### Design Features

- Diamond-impregnated cutting edge
- Robust steel body
- Non-coring design
- Reduced vibration construction

### Suitable Materials

Tile, Glass, Ceramic, Stone

## Performance

### Performance Highlights

**1 High**

Drilling Precision

**1 Low**

Vibration Level
