Product Overview

Professional Diamond Polishing System

This versatile diamond polishing pad set is engineered for the precision grinding and polishing of various stone surfaces, including granite and marble. Designed for both wet and dry applications, these tools excel at finishing corners, inner and outer arcs, and special-shaped surfaces. With high abrasion resistance and excellent sharpness, this system ensures a high-gloss finish exceeding 80 degrees while maintaining long-term durability.

Technical Specifications

Polishing Modes

Wet Polishing • Dry Polishing • Wet & Dry Hybrid

Available Grit Sizes

50#, 100#, 200#, 400#, 800#, 1500#, 3000#, BUFF

Performance Metrics

Performance Highlights

80 degrees

Gloss Level

Key Advantages

- Excellent working effect
- High precision
- Long lifespan
- Good sharpness
- Stable quality

Usage Guidelines

Usage Instructions

Application	Water Requirement
Wet Polishing	Continuous cooling required
Dry Polishing	No water required
Buffing	Minimal water recommended
