

Diamond Saw Blade for Concrete Stone Masonry

Professional grade diamond saw blade designed for cutting concrete, stone, and masonry materials. It features laser-welded segments with high diamond concentration for fast, clean cuts and extended blade life.

Product Overview

Professional Grade Diamond Saw Blade

This professional-grade diamond saw blade is engineered for precision cutting across concrete, stone, and masonry materials. Featuring laser-welded segments with a high diamond concentration, it ensures fast, clean cuts while providing significantly extended blade life. The versatile design supports both wet and dry cutting applications, making it a reliable choice for diverse construction and fabrication tasks.

Technical Specifications

Cutting Methods

Wet Cutting • Dry Cutting

Construction Features

- Laser-welded segments
- High diamond concentration

Suitable Materials

Concrete, Stone, Masonry

Compatibility

Compatible Tools

- Angle Grinders
- Circular Saws
