

Diamond Saw Blade for Hard Materials

This diamond saw blade is available in sizes from 105mm to 3500mm. It offers fast cutting speeds, straight edges, long life, smooth cutting, and quiet operation.

Product Overview

High-Performance Diamond Cutting Solution

This professional-grade diamond saw blade is engineered for precision cutting across a wide range of hard materials, including granite, marble, sandstone, concrete, and ceramic. Featuring a durable segmented rim design, it ensures efficient material removal, optimal heat dissipation, and reduced vibration during operation. Suitable for both wet and dry cutting applications, this blade is built for long-lasting performance in construction, demolition, and stone processing environments.

Technical Specifications

Dimensions

350 mm
Diameter

50 mm
Core Thickness

15 mm
Segment Height

Application Methods

Wet Cutting • Dry Cutting

Compatible Materials

Granite, Marble, Sandstone, Concrete, Ceramic, Asphalt

Design Features

Key Features

- Segmented rim for efficient debris removal
- Trapezoidal segment design for enhanced stability
- Engineered for reduced vibration and heat dissipation
- Industrial-grade diamond particles for precision

Available Size Range

105mm to 3500mm
