

Diamond Saw Blades

High-performance diamond saw blades designed for cutting stone and concrete. These blades have enhanced cooling slots for efficient heat dissipation and extended blade life.

Product Overview

High-Performance Diamond Saw Blades

These professional-grade diamond saw blades are engineered for demanding cutting tasks involving stone, concrete, and other hard construction materials. Featuring a robust steel core and premium diamond-impregnated segments, they deliver fast, precise, and clean cuts. The design incorporates enhanced cooling slots to ensure efficient heat dissipation, significantly extending the blade's operational lifespan in heavy-duty environments.

Technical Specifications

Key Features

- Durable steel core
- Diamond-impregnated segments
- Enhanced cooling slots for heat dissipation
- Extended blade life

Industry Applications

Construction • Demolition • Stone Fabrication

Performance Highlights

1 High

Cutting Precision

1 Enhanced

Heat Dissipation

Compatible Materials

Stone, Concrete, Hard Materials
