

Diamond Segmented Cutting Tool

This diamond tool is designed for cutting through tough materials. It features a segmented rim for efficient debris removal and a durable construction for long-lasting performance.

Product Overview

Professional Diamond Segmented Cutting Tool

This diamond segmented cutting tool is engineered for high-performance cutting in demanding industrial environments. Featuring a specialized segmented rim design, it ensures efficient debris removal and consistent cutting speed through tough materials. Built for durability, this tool is an essential asset for heavy-duty applications in construction, demolition, and infrastructure projects.

Technical Specifications

Blade Diameter	16 inch
Rim Design	Segmented

Usage & Safety

Safety Requirements

- Always use safety guard
- Eye protection required
- Follow all operating instructions

Application Areas	Construction, Demolition, Heavy-duty Cutting
